How to Create a Short-Form Post

AI makes it easy to create engaging short-form content for LinkedIn and social media. Follow these simple steps to generate, refine, and optimize your post in minutes.

STEP 01

DEFINE YOUR POST

- Topic: What's your main message?
- Audience: Who is this for?
- Tone: Informative, casual, professional

Example Input (prompt): "How AI is transforming the job search process for candidates."

STEP 02

GENERATE A DRAFT

AI creates a short, engaging post based on your input.

Example of AI-generated post: "AI is changing job searching! With AI-driven job matching, resume optimization, and virtual career coaching, candidates find opportunities faster and more efficiently. The future of job hunting is here—are you ready?"

STEP 03

REFINE & OPTIMIZE

Choose from AI suggestions:

- Make changes to sound more "like you" and concise.
- Add a question to boost engagement.
- Include hashtags for visibility.

Example Refinement: "AI is streamlining job searching! Smart matching and resume optimization help candidates land roles faster. Have you used AI in your job search? 🤖🌟 #JobSearch #AI #CareerGrowth"

STEP 04

PUBLISH & ENGAGE

Post directly to LinkedIn, Twitter, or other platforms.

- AI suggests best posting times.
- AI generates follow-up comment ideas.

Engagement Tip: Ask a question or invite opinions for better interaction.

Give it a try and see how AI can simplify your content creation!
